

This PDF is simple to use! Just click on any cell within this table and begin typing to enter your personal information. You can also print a blank goals sheet and fill it out by hand.

Under each subject, decide on three goals that are realistic for your child's age-group. Once your goals are determined, develop at least three approaches to achieve them and fill those in under the "approach" headings. Having numerous approaches allows you to keep things interesting. You can also keep trying different things until your child achieves their goals. This sheet can be revised as often as you need; this way all your goals can evolve. Remember: this is homeschool, you have the freedom to move at your child's own pace!
